JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

PREVALENCE OF DISEASE.

No health department, State or local, can effectively prevent or control disease without knowledge of when, where, and under what conditions cases are occurring.

UNITED STATES.

RECIPROCAL NOTIFICATION.

Minnesota.

Cases of communicable diseases referred during June, 1916, to other State or provincial health departments by department of health of the State of Minnesota.

Disease and locality of notification.	Referred to health authority of—	Why referred.
Diphtheria: Minneapolis Health Department, Hennepin County.	Chippewa Falls, Chippewa County, Wis.	Patient went home to Wisconsin without permission of Minneapolis Health Department.
Epidemic cerebrospinal meningitis: Winona, Winona County	Redfield, Spink County, S. Dak.; United States Public Health Service.	Body shipped to South Dakota. Father ill there.
Leprosy: Minneapolis, Hennepin County.	Whitefish, Flathead County, Mont.; United States Public Health Service.	Patient returned to home in Montana.
Smallpox: St. Paul Bureau of Health, Ramsey County.	Poplar, Sheridan County, Mont.; Chicago, Milwaukee & St. Paul Ry.	Patient from Montana arrived in Minnesota ill with smallpox.
Tuberculosis: Mayo Clinic, Rochester, Olmsted County.	Denver, Denver County, Colo.; New Bedford, Bureau County, Ill.; Poland, R. R. No. 1, Clay County, Ind.; Bedford, Lawrence County, Ind.; Rake, Winnebago County, Iowa; Dubuque, Dubuque County, Iowa; Fort Dodge, Webster County, Iowa; Boone, Boone County, Iowa; Hampton, Franklin County, Iowa; Newell, Buena Vista County, Iowa; Klein, Musselshell County, Mont.; Brittin, Burleigh County, N. Dak.; Weiston, Hancock County, W. Va.; Basson, Basson County, Wis.; Darlington, Lafayette County, Wis.; Horeb, Dane County, Wis.; Blanchardville, Lafayette County, Wis.; Portage, Columbia County, Wis.; Milwaukee, Milwaukee County, Wis.; Stowe Farm, Saskatchewan, Canada.	6 advanced, 8 moderately advanced, 1 "cured" case left Mayo Clinic for homes, 1 incipient, 5 advanced, 2 moderately advanced, and 2 active cases left Mayo Clinic for homes.
Thomas Hospital, Minneapolis, Hennepin County.	Fort Dodge, Webster County, Iowa; Glasgow, Valley County, Mont.; Clayton, Polk County, Wis.	2 cases died at and 1 advanced case discharged from Thomas Hospital.
Pokegama Sanatorium, Pine County.	Britton, Marshall County, S. Dak.; Beresford, Union County, S. Dak.	2 open cases left Pokegama Sanatorium for homes.
St. Paul Bureau of Health, Ramsey County.	Phillips, Price County, Wis.....	1 open case left St. Paul for Wisconsin.
Typhoid fever: Minneapolis Health Department, Hennepin County.	Hankinson, Rice Land County, N. Dak.	Patient was living, 3 weeks previous to earliest symptoms, in Hankinson, N. Dak.

ANTHRAX.**State Reports for June, 1916.**

During the month of June, 1916, there were reported, by States, five cases of anthrax in Massachusetts and one case in New Jersey.

LEPROSY.**California—San Francisco.**

The health officer of San Francisco, Cal., reported July 15, 1916, concerning a case of leprosy as follows: J. H. P., age, 40 years; nativity, United States; resident of San Francisco for the past 7 years; came to this city from Denver, Colo.; has never been out of this country. The patient left for Louisville, Ky., June 7, 1916.

Louisiana—Mansfield.

During the month of June, 1916, a case of leprosy, in the person of R. W., age 27, male, colored, was reported at Mansfield, La.

Minnesota—Minneapolis.

During the month of June, 1916, a case of leprosy, in the person of M. H., age 27, male, unmarried, Chinese, was reported at Minneapolis, Minn. The patient is a native of the town of Otage, Japan, has been in the United States for nine years, and has lived in Montana until he came to Minneapolis, March 7, 1916.

Leprous symptoms began during convalescence from a severe burn due to a gasoline explosion at Essex, Mont., in 1911. There is no history of leprosy in the patient's family.

Montana—Whitefish.

The State health officer of Montana reported, by telegraph, July 22, 1916, that a case of leprosy had been notified at Whitefish, Mont.

POLIOMYELITIS (INFANTILE PARALYSIS).**California.**

San Francisco.—Senior Surg. Pierce reported July 25: Two new cases of poliomyelitis recorded during week ended July 24. Total number of cases reported to date, 5.

Illinois.

The State health officer of Illinois reported, July 21: Cases of acute poliomyelitis in Illinois confirmed since report of July 18 are: 1 each at Benld, Carrier Mills, Collinsville, near Cherry, Dimmick, Elizabethtown, Frankfort Heights, near Galena, Hinckley (dead), and near Kansas. Chicago, 5 cases. Under investigation: 1 each at Burnt Prairie, Dalton City, Decatur, Duquoin, near Hammond, Kankakee, near Long Creek, near Oregon, near Ottawa, and near Ridge Farm.

Olive Branch.—Senior Surg. Gassaway reported, July 22: Second case poliomyelitis at Olive Branch, this county.

Kansas.

Fowler.—Collaborating Epidemiologist Crumbine reported, July 19: One case poliomyelitis notified from Fowler.

Louisiana.

Collaborating Epidemiologist Dowling reported, July 22: Since June 1, 14 cases of infantile paralysis have been officially reported.

Massachusetts.

Collaborating Epidemiologist Kelley reported July 22: During the month of July, up to and including July 22, there have been reported to the State department of health 71 cases of acute anterior poliomyelitis. In 8 of these cases the diagnosis is doubtful or negative. The distribution is as follows: Westfield 8, North Adams 7, New Bedford 6, Worcester 5, Fall River 4, Dudley 3, Palmer 3, Springfield 3, Newton 2, Lowell 2, Lawrence 2, Pittsfield 2, Marlboro 2, Webster 2, West Medway 2, Natick 1, Malden 1, Middleboro 1, Woburn 1, Haverhill 1, Sheffield 1, Sharon 1, Hawley 1, West Hanover 1, North Raynham 1, Holyoke 1, Greenfield 1, Boston 1, Norwood 1, North Dartmouth 1, Maynard 1, East Hampton 1, Fairhaven 1. Ten of these cases have either been imported from New York or been in contact with New York cases.

Michigan.

Detroit.—Senior Surg. Austin reported, July 18: The third case thus far in the city, all cases being of a mild type.

POLIOMYELITIS (INFANTILE PARALYSIS)—Continued.**Mississippi.**

Collaborating Epidemiologist Stingily reported July 19: The following includes all cases of infantile paralysis reported by the county health officers in June and the additional cases up to date: Bolivar 1, Chickasaw 1, Clay 1, Coahoma 1, Copiah 1, Covington 2, Harrison 2, Hinds 1, Holmes 2, Jackson 2, Jasper 3, Jefferson Davis 2, Lawrence 13, Lee 1, Lincoln 1, Madison 1, Marion 8, Lowndes 15, Noxubee 1, Rankin 2, Scott 6, Simpson 6, Warren 1, Washington 1, Yalobusha 1.

New Jersey.

Perth Amboy.—Acting Asst. Surg. Naulty reported July 24: Week ending to-day, three new cases poliomyelitis, total to date 7 cases, 1 death.

New York.

Pursuant to section 34 of the Interstate Quarantine Regulations, Dr. F. M. Meader, director of the division of communicable diseases, New York State Department of Health, reported July 22 relative to the prevalence of poliomyelitis (infantile paralysis) in the State of New York outside of New York City as follows:

During the month of June 26 cases were reported. So far in July 182 cases have been reported with 23 deaths. Inclosed are two reports which indicate the location of cases up to the 19th instant.

The cases are most numerous on Long Island, particularly in Nassau County. Sporadic cases are appearing in different parts of the southern counties of the State. In Hudson, in Columbia County, apparently, an independent focus has developed. No connection with the New York outbreak has as yet been determined. There are 84 different foci in the State and there are 43 cases which came from New York City. Up to the present, apparently, there have not been many secondary cases from those which came from New York City.

The department has just been given a special appropriation for the handling of the situation. A sanitary supervisor has been transferred to assist on Long Island; two special sanitary supervisors will be appointed next Tuesday. Several diagnosticians will be appointed in several of the counties in the lower part of the State as the situation requires. Three laboratory centers will be established where ample facilities will be afforded for the examination of spinal fluid or any other laboratory tests that it may be desirable to make in order to determine the diagnosis in difficult cases.

POLIOMYELITIS (INFANTILE PARALYSIS)—Continued.
